

Cenergistic®

Introducing Audit Functionality for Cenergistic GreenX™

GreenX continues to evolve yet again — this time providing Energy Specialists with a convenient platform to complete audits.

With GreenX, now you can audit facilities easier than ever before.

What does Audit Functionality Bring to GreenX?

INTEGRATED PROCESS

- Audits now take place through GreenX, allowing for a more in-depth investigation and fewer apps to keep up with
- GreenX runs on any iOS or Android device — a Wi-Fi signal isn't required

PREDICTIVE AUDITS

- Using data from previous audits, GreenX will predict where to focus on next for maximized savings

CONNECTING CLIENTS

- Cenergistic's Executive application, Audit Dashboard, gives our clients insight into the audits that have been completed in their facilities.
- Audit findings that need immediate action can be sent to applicable parties – e.g., maintenance staff – creating quicker workflow resolutions.
